SUMMARY

Performant-driven Frontend Developer with 1+ years of experience building responsive and scalable web applications using ReactJS and TypeScript. Proven ability in designing modular UI systems, optimizing web performance, and configuring CI/CD workflows. Passionate about writing clean, type-safe code and delivering high-quality, user-centric features.

TECHNICAL SKILLS

Front-End	ReactJS, TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux Toolkit, Context API, Tailwind CSS, Ant Design, Craft.js
Back-End	Node.js, Express.js, NestJS, RESTful APIs
Database	MongoDB, MySQL
Tools & DevOps	Git, Docker, GitHub Actions, AWS S3, CloudFront, Nginx
Other	Socket.IO, WebRTC, Firebase, Web Performance Optimization, Responsive Design

WORK EXPERIENCES

Automation Land June 2025 – Present
Frontend Developer Fresher Ho Chi Minh City, Vietnam

- Designed and developed a modular, drag-and-drop landing page builder from scratch using ReactJS and Craft.js, improving page deployment speeds for marketing teams by 50%.
- Developed and published a high-performance Zalo Mini App serving 6,000+ active users, integrating secure JWT authentication and optimizing global state.
- Refactored legacy JavaScript codebases to strict TypeScript, establishing comprehensive type safety and reducing runtime bugs by 35%.
- Implemented automated CI/CD workflows using GitHub Actions and Docker, and configured AWS S3 + CloudFront CDN to optimize asset delivery, reducing LCP by 30%.

PROJECTS

VChat – Real-time Chat Application Dec 2025 – Apr 2026
Full Stack Developer github.com/xuanphat0505/social-network-fe | github.com/xuanphat0505/social-network-be
Tech Stack: ReactJS, Redux Toolkit, Node.js, Express.js, MongoDB, Socket.IO, WebRTC.

- Built a scalable, real-time 1-on-1 messaging platform with features such as typing indicators, message delivery status, and message revocation utilizing Socket.IO.
- Integrated secure peer-to-peer audio and video calling capability using WebRTC, utilizing STUN/TURN servers to resolve firewall traversal issues.
- Implemented a robust authentication system featuring JWT access/refresh token rotation, HTTP-only cookie storage, and OTP verification via NodeMailer.
- Optimized application performance by implementing virtual list rendering for long message histories (1000+ items) and utilizing memoization to prevent unnecessary React re-renders.

Movie Streaming Website Jan 2025 – May 2025
Full Stack Developer github.com/xuanphat0505/movie-website-fe | github.com/xuanphat0505/movie-website-be
Tech Stack: ReactJS, Node.js, Express.js, MongoDB, Socket.IO.

- Created a fully responsive movie streaming application optimized for desktop, mobile, and smart TV browsers.
- Developed an administrative dashboard from scratch featuring analytical charts, CRUD operations, and role-based access control (RBAC).
- Designed RESTful APIs using Node.js/Express and optimized MongoDB query performance by leveraging aggregation pipelines for complex movie filtering.
- Integrated Socket.IO for real-time system alerts, chat lobbies, and collaborative watch parties.

EDUCATION

Posts and Telecommunications Institute of Technology (PTIT) 2022 – 2027
Bachelor of Internet of Things (IoT) GPA: 3.25 / 4.0
